

# RAAG Road Safety Presentations

The Road Accident Action Group (RAAG) delivers road safety presentations to organisations throughout the Mackay and Bowen Basin Region. Our presentations focus on specific road safety issues relevant to our region, and are facilitated by experienced RAAG presenters. We offer two presentations:

## Road Safety Awareness

## Road Safety Fatigue Management

### Recommended Audience

These presentations are designed to be accessible by any organisations or community groups, helping to create a road safe culture in our community. They are aimed for group sizes between 15 – 150 (min. audience size of 20 for the fatigue presentation).

The **Road Safety Awareness Presentation** is a one-hour interactive presentation aimed at increasing awareness of road safety risks and issues in the Mackay and Isaac regions. Experienced facilitators guide participants to understand their own risk profile and how they play a part in staying safe on our roads.

Our **Road Safety Fatigue Management Presentation** focuses on the issue of fatigue and runs for 1-2hrs. Fatigue plays a significant role in the majority of fatal crashes in our region, making fatigue awareness and management vital. The presentation is designed to be personal and impactful, encouraging individuals to confront their own vulnerability on the road.
